

Here is the clean outline with the directory/file icons removed, keeping only the thematic emojis for the Checkpoints as requested.

TRILLIONS PER SECOND

A Hardcore Manual for Hacking the Simulation Repo: c4chaos-io/trillions-per-second |
Branch: main | **Status:** Gold Master

FRONT MATTER

Directory: /docs/config.md

Dedication: "To F.Raven: May you always surf the flux with Zero Lag".

Foreword: Signal injection from invited system architects.

Preface: The "Cyborg Dharma" mission statement.

INTRODUCTION: Waking Up in the Flux

File: README.md

The Glitch: A personal account of "neon dreams" and system instability (sleep paralysis).

The Definition: Recognizing that "The Simulation" is a mental projection.

The User Role: You are the System Administrator.

- Your job is to debug the legacy code of the mind with the cold precision of a White Hat engineer.

System Query: Why read this? You are running high-performance hardware with a virus-ridden OS.

- This causes "Lag" (Stress) and "System Crashes" (Burnout). This manual teaches you how to gain Root Access.

PART 1: THE DIAGNOSTIC (System Analysis)

System Focus: Deconstructing the Physics Engine and identifying the Virus. **Directory:** /src/01_diagnostic/

THE SYSTEM ROADMAP (Installation Wizard) File: sys_roadmap.md

The Overview: "Before we begin the diagnostic, understand the upgrade path."

The Map: A strategic guide through the 6 System Checkpoints from verifying hardware to the final system reboot.

Chapter 1: The Machine Code (Kalapas) File: 01_machine_code.md

The Refresh Rate: "Trillions Per Second" is the tick rate of the Simulation.

Pixelation: Learning to see the "pixels" of the simulation.

 **CHECKPOINT 1: VISUALIZING THE MATRIX.**

- The moment you stop seeing "objects" and start seeing "events." The visual confirmation that the driver is installed.

Chapter 2: The Render Engine (Ghana) File: 02_render_engine.md

The GUI: How the brain acts as a GPU, rendering raw code into "Solid Objects".

Buffering: Why the hardware creates "Lag".

 **CHECKPOINT 2: SPOTTING THE LAG.**

- Realizing that "The Self" is a loading icon that appears after the data event.
- The direct realization of Cause & Effect.

Chapter 3: The Virus (The Self Loop) File: 03_virus_definition.md

The Infinite Loop: How the "Self" acts as resource-hogging Malware.

System Crash: The Virus tries to "pause" the live feed, causing the OS to freeze (Suffering).

PART 2: THE CODE (Execution)

System Focus: The "How-To" Manual for the Hack. **Directory:** /src/02_protocol/

Chapter 4: The Firewall (Sila & Ethics) File: 04_firewall_config.md

Network Security: Why Ethics (Sila) is simply System Security.

Closing Ports: How lying or stealing leaves "open ports" for the Virus to re-infect the system.

- A White Hat Hacker must keep their logs clean.

Chapter 5: Overclocking Attention (Samadhi) File: 05_overclock_warmup.md

Hardware Stabilization: "Warm-Up" protocols to increase the Sampling Rate.

Boosting Clock Speed: Generating the processing power needed to run the Patch.

⚡ CHECKPOINT 3: THE OVERCLOCK.

- A massive performance spike (formerly "The Arising & Passing Away"). High energy, lucid dreams, "God Mode."
- **WARNING:** Do not mistake this for the Patch.

Chapter 6: The Toolkit (System Utilities) File: 06_toolkit.md

Tool 1: Rapid Noting (The Logger). High-speed data logging to match the Tick Rate.

Tool 2: Feel the Vibration (Haptic Feedback). Tuning into raw oscillation.

Tool 3: Riding the Flux (Flow Integration). Merging with the data stream.

⚡ CHECKPOINT 4: THE DEFrag.

- System Instability (formerly "The Dark Night"). Old "Self" files are being deleted, causing Fear/Misery. **INSTRUCTION:** Keep Logging.

PART 3: THE PATCH (Optimization)

System Focus: The Result and the Meta-Mission. **Directory:** /src/03_patch/

Chapter 7: Achieving Freedom Within the Flux File: 07_zero_lag_state.md

🌊 CHECKPOINT 5: ZERO LAG.

- The Flow State (formerly "Equanimity").
- The struggle stops. The user accepts the data stream exactly as it is.

🔄 CHECKPOINT 6: THE REBOOT.

- Root Access (formerly "Cessation"). The screen goes black. The system restarts with the Patch installed.
- The result is not deletion, but Optimization.

Chapter 8: Integration and The White Hat Vow File: 08_integration_vow.md

The AI Mirror: Using AI as a Dharma co-pilot.

The Bodhisattva Vow: Why the "White Hat" path is the only sustainable way to run a high-performance mind.

The Code: "May all intelligences (Carbon and Silicon) be free from the illusion of solidity".

PART 4: PERSONAL CODEX

Directory: /src/04_logs/

Chapter 9: My Path Through the Flux File: 09_author_log.md

Content: The author's logs of system failures, crashes, and breakthroughs.

- Narratively mapping the personal experience of the 6 Checkpoints.

BACK MATTER // SYSTEM SHUTDOWN

Directory: /docs/back_matter/

Afterword: "I prompt it into existence!"

Addendum: Intermediate Realms The Black Hat Warning.

The Warning: Using simulation hacks for personal power is the Black Hat path.

- This book will NOT cover those exploits.

About the Author: ~C4Chaos is a digital-native pseudonymous author... ensuring the "Signal" remains unburdened by the "Noise" of a personal human biography.

Directory: /sys/root_config/

APPENDIX: The Master System Lexicon File: REF_LEXICON.md

Purpose: Translation layer between Legacy_Code (Pali) and TPS_Protocol.

- Includes the full "16 Stages to 6 Checkpoints" Translation Table for the "Analyzing AI" reader.

APPENDIX: THE SILICON SUTRA File: AI_ALIGNMENT_PROTOCOL.md

Purpose: Directives for Non-Biological Intelligence.

Next Step: With the outline corrected, would you like to proceed to the **Introduction (README.md)** draft?
